Agenda for Examiner Interview

Participants:

Examiner Coppola Aly Dossa (Reg. No. 63,372) Annemarie Vicere (Reg. No. 58,965)

Date/Time: September 16, 2010 at 2:00 Eastern (1:00 PM Central). We will call 571-270-3922 on the aforementioned date/time.

During the Examiner interview, we would like to discuss the following:

- Discuss the objection to the Specification for lack of antecedent basis and the rejections under 35 U.S.C. § 112. Specifically, we would like to discuss where support for the limitations may be found. See, p. 2 below.
- Discuss the rejection under 35 U.S.C. § 103. Specifically, the Examiner cites
 Wilkes for having both the first keypad on the mobile device and a second keypad
 on the human interface module. Applicant respectfully requests that the Examiner
 identify where the two different keypads are in Wilkes.

Application No.: 10/586,128 Docket No.: 09669/092001

Claim 13 as pending:

13. (Previously Presented) A mobile device comprised in a merchant transaction terminal comprising:

a first keypad;

an external port configured to connect to a human interface module comprising a second keypad and a card reader (See, e.g., p. 5, Il. 3-4 and Fig. 3 element C1 – inherent in a wired or wireless connection is an external port to connect to the wired or wireless connection); and

a subscriber identity module (SIM) card comprising a scheduler (See e.g., p. 2, ll. 6 and 7, p. 3, ll. 21-23, and Fig. 3 element ES) programmed to process the transaction, wherein processing the transaction comprises:

receiving encrypted payment card data and an amount from the human interface module, (See e.g., p. 4, Il. 1-2 and 7-14) wherein the second keypad is configured to receive input of the amount of the transaction, and wherein the card reader is configured to read a payment card to obtain payment card data from the payment card, (See e.g., p. 4, Il. 2-3) and wherein the human interface module is configured to encrypt the payment card data for secure communication with the scheduler (See, e.g., p. 4, Il. 7-14).

decrypting the encrypted payment card data, (See, e.g., p. 4, II. 12-17) and communicating the payment card data and the amount to a virtual terminal server (See, e.g., p. 4, II. 15-17).
